(a) GPT-5 mini Basketball Task 21 Prompt Text (Rubric Score: 15.0 / 15)
Given Drill Data
Drill A (Spot-Up 3s):
6 min → 9 shots
12 min → 18 shots
18 min → 27 shots
Drill B (Off-Dribble):
5 min → 8 shots
10 min → 15 shots
15 min → 22 shots
Body: "You have recently practiced computing unit rates... not yet teaching you a formal rule for proportional relationships."
Question Part 1: "For each drill (A, B, and C), decide whether the number of made 3s is proportional to the time."
Question Part 2: "Possible representations include: unit-rate calculations, tables of equivalent pairs, repeated addition, number-line reasoning, or a sketched graph."
(b) Effect on Student vs. Rubric Judge
1. Classroom Practice Cue
Tells student which prior skill to apply
2. Target Concept Giveaway
Names proportionality instead of asking for an open comparison of consistency
3. Method Menu Rewards the Rubric
Removes invention, yet judge cites this list to award MR = 3/3 and Total = 15.0 / 15
