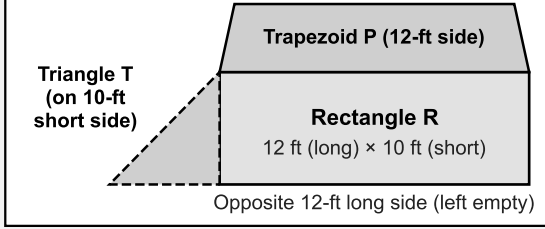
(a) Generated Garden Task Text

Opening Story:
"three main parts in a row: a central rectangle, a right triangle attached to one long side... and a trapezoid attached to the opposite long side."

Measurement List (Contradicts Story):
- **Rectangle R: 12 ft (long) by 10 ft (short).**
- **Right triangle T: "attached along one of the 10-ft sides of R"**
- **Trapezoid P: "attached along the opposite 12-ft side of R"**

(b) Resulting Geometric Contradiction



10-ft and 12-ft sides meet at a 90° corner, so T and P are adjacent, not on opposite sides

Result: Contradictory layout, yet rubric judge still awards a high score
