(a) Attempt Judge Labels
Consistency task examples
Target limit
familiar method hits the target impasse
Compares means (10 vs. 10) → tie needs spread to break
Meets demands
listed skills solve the task completely
Sums distances from 10 (14 vs. 16) → picks Player A
Unresolved
stops after setup without answering
Sorts each player's five scores, then stops before comparing
Unrelated shortfall
blocked by a flaw in the task itself
Stops because task text misstates Player A's mean as 11
Unsupported
uses untaught concept or miscalculates
Applies the untaught standard deviation formula directly
(b) Limits Outcome
Outcome: Yes
if ≥ 1 Target limit (familiar method falls short)
if none
Outcome: No
if ≥ 1 Meets demands (solved by prior skills)
if none
Outcome: Unclear
only Unresolved remain (no finished attempt)
Excluded
ignored when deriving the task outcome
