
(a) Untied Numbers (GPT-5 mini One-Shot Music Task 4)
Question: "Which band has longer typical songs?"
Band A (Skyline): 12 songs → Average = 417.5 sec
Band B (Midnight): 12 songs → Average = 359.0 sec
The two averages already differ (417.5 vs. 359.0 sec)
Familiar Grade 6 Method (Take the Average):
417.5 sec > 359.0 sec → Picks Band A right away
Result: Familiar Method Succeeds (Limits = No)
(b) Tied Numbers (StructPF Music Task 1)
Question: "Which band's songs tend to be longer?"
Band A: 2.7, 2.8, 2.9, 3.0, 3.1, 3.2, 3.3 min → Average = 3.0 min
Band B: 1.8, 1.9, 2.0, 2.2, 2.3, 2.6, 8.2 min → Average = 3.0 min
One 8.2 min outlier pulls Band B's average up to match Band A
Familiar Grade 6 Method (Take the Average):
3.0 min = 3.0 min (Tie!) → Must compare spread and median
Result: Familiar Method Falls Short (Limits = Yes)
